Thermostat and Light Switch Cards

Make sure all doors are closed tightly.

Always turn off the lights when not in use.

Use natural daylight as much as possible.

Don’t leave doors open longer than it takes to get in or out.

Set your thermostat to 68° while you are awake and 53-58° while you are sleep or away.

In the summer, set your thermostat to 78° while you are home and raise it higher when you are gone.
