

Calculating Your Foodometer

How far does your food travel? Choose five food items from the "Where Does Your Food Come From" worksheet. Using a map, calculate the distance from your hometown, to the capital city of the state that produces your chosen food item. Use the table below to record your data findings, and then answer the questions below.

	Food Item	Location	Distance Traveled
1.			
2.			
3.			
4.			
			Total:

Directions: Use the data to answer the questions below. Be sure to include your calculations below each answer.

1. What is the total distance your food traveled? _____
2. What is the average distance your food traveled? _____
3. What is the shortest distance one of your items of food traveled? _____
4. What is the farthest distance one of your items traveled? _____
