## Building Simple Name: Hydroponics

## You Will Need:

- 2 liter soda bottle
- Wick
- 1-2 teaspoons nutrient solution
- Litmus paperVermiculite
- Cilantro Seeds

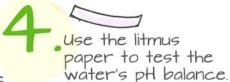

Cut the top off the 2-Liter bottle where it first reaches its widest circumference point.

Put the top upside down, so the neck and 'lid face the bottom of the inside of the bottle

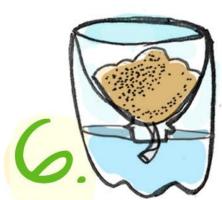

Add enough water so that it always touches the bottle's neck. Add the nutrient solution.

Add the wick. Make sure it extends into the neck.

Add the growing media. Vermiculite is a traditional media and has a medium capability of transporting

Add the cilantro seed. The seeds need to be spaced at least six inches apart, do not place too many seeds in the system.
